Ruler Foot #72

Adjustable Ruler Foot #72

We are pleased to inform you about the new adjustable Ruler foot 72, which has been especially developed for quilting on BERNINA sewing machines.

This foot allows you to sew along Plexiglas rulers to create decorative quilt designs such as lines, feathers, circles etc. Any commercial Plexiglas rulers at a size of $\frac{1}{4}$ inch can be used. The height of the sole makes it possible to quilt along all the edges of Plexiglas rulers which is of utmost importance especially with circles.

With this technique the feed dog is lowered and the fabric with the Plexiglas ruler is guided manually. Due to the adjustment dial, the height of the foot can be adjusted to match the fabric thickness individually so that the fabric can be moved smoothly and without getting stuck. Moreover, this additional option provided by the adjustable foot height extends the scope of applications for BERNINA sewing machines without the function 'automatic presser foot pressure/presser foot height'.
